01 Internship Details

- Organization: CodeAlpha
- Profile: Java Programming Intern
- Mode: Completely online / virtual
- Duration: 10th September 2026 - 10th October 2026
- Offer Letter Issue Date: 2nd September 2026

02 Student Details

- Name: Ayush Kumar
- Roll No.: 25SCS2040003499
- Programme: MCA
- Batch: 2025–2027
- University: IILM University, Greater Noida, U.P.

ACADEMIC OBJECTIVES

Objectives of the Internship

- Enhance practical skills in Java programming and problem-solving.
- Apply OOP principles including classes, objects, encapsulation and methods.
- Organize application data using ArrayList and object-oriented structures.
- Build interactive user interfaces for real-time interaction.
- Implement input validation and meaningful system feedback.
- Perform calculations, manage data and present information clearly.
- Gain exposure to basic NLP techniques and rule-based chatbot logic.

CODE ALPHA

Internship Organization

A Industry

- Software development & practical training

B Focus

- Hands-on project development and programming practice

C Mode

- Virtual / online internship

CodeAlpha served as the internship organization for the project work. The assignments were designed around practical software- development activities.

TECHNICAL STACK

Technologies & Tools Used

JAVA
Primary programming language

OOP
Classes, objects, methods

COLLECTIONS
ArrayList, HashMap

SWING
Desktop GUI for chatbot

FILE I/O
Persistent hotel bookings

SCANNER
Console input handling

NLP LOGIC
Preprocessing & keyword matching

DATE/TIME
Dynamic date and time responses

DEVELOPMENT APPROACH
Methodology

Incremental development was used: requirements → design → implementation → data handling → interface → testing → documentation.

PROJECT PORTFOLIO

Projects Developed

01
Student Grade Tracker
Student data + grades + statistics

02
Stock Trading Platform
Market data + buy/sell + portfolio

03
Artificial Intelligence Chatbot
Java Swing + FAQ + rule- based logic

04
Hotel Reservation System
Search + booking + cancellation + File I/O

Project 1 — Student Grade Tracker

01 Key Features

- Console-based Java application.
- Student class with an ArrayList of grades.
- Accepts number of students and subjects.
- Validates grades within the 0–100 range.
- Calculates average, highest and lowest scores.
- Produces a formatted console summary.

→ Implementation Flow

- User Input
- Student Object Creation
- Grade Storage
- Grade Calculations
- Formatted Report

Core concepts: classes, objects, ArrayList, validation and statistical calculations.

02

Key Features

- Simulated trading environment.
- Stock objects store symbol, company name and price.
- User maintains cash balance, portfolio and transaction history.
- Buy checks available balance; sell checks holdings.
- Portfolio value can be calculated.
- Market price movement is simulated.

→

Implementation Flow

- Market Data
- User Action: BUY / SELL
- Portfolio & Balance Update
- Transaction Record
- Portfolio / Account View

Academic simulation only — the project models trading workflows rather than real financial trading.

03

Key Features

- Java Swing desktop application.
- FAQ knowledge base stored using HashMap.
- Lowercase conversion and punctuation removal.
- Extra spaces are normalized.
- Keyword similarity is used for intent matching.
- Date and time responses plus fallback messages.

→

Processing Flow

- User Message
- Text Preprocessing
- Keyword / Intent Matching
- Response Selection
- Response Displayed in GUI

Important: the report describes this as rule-based / NLP-inspired logic, not a production machine- learning chatbot.

04

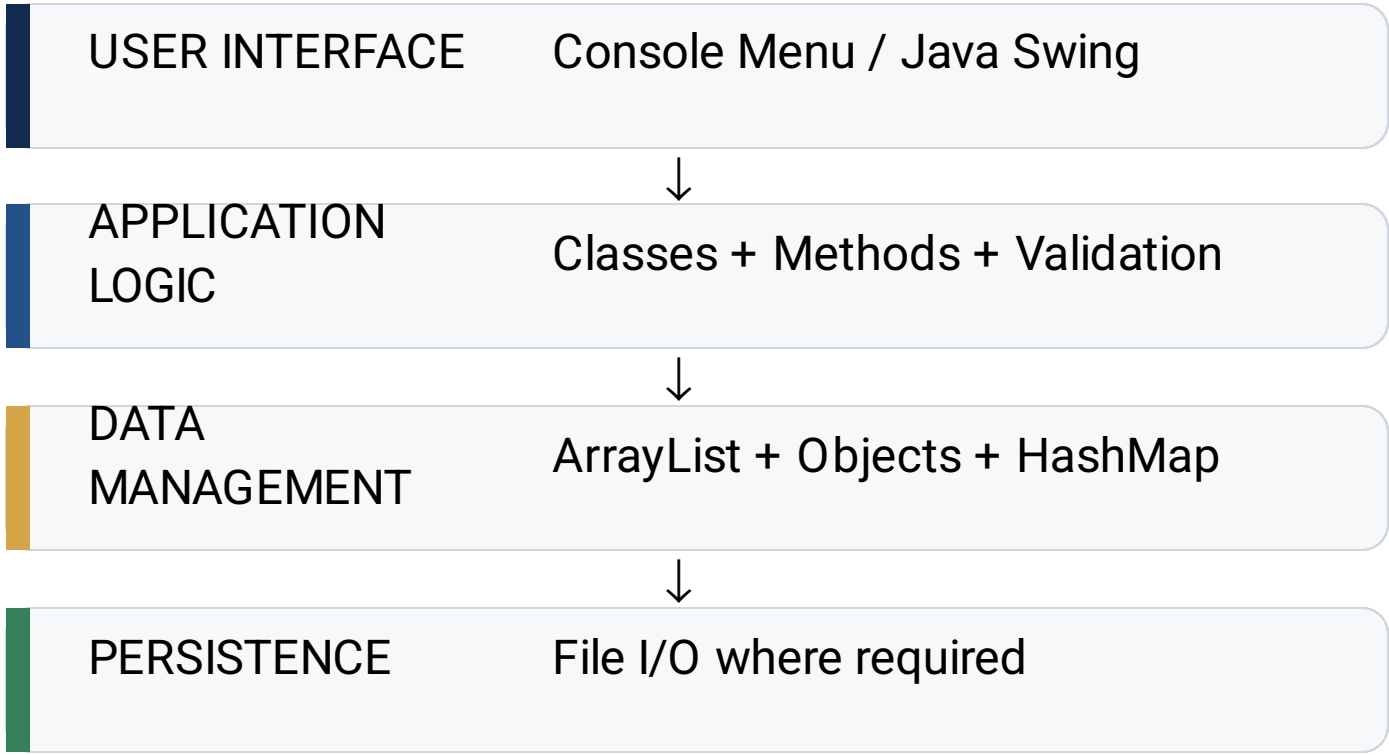

Key Features

- Console-based hotel reservation application.
- Room types: Standard, Deluxe and Suite.
- Searches available rooms by category.
- Creates a unique booking ID.
- Supports booking and cancellation.
- Simulates payment and stores active bookings.

→

Persistence Flow

- Load Saved Bookings
- Search Room Availability
- Create Reservation
- Simulate Payment
- Save to hotel_bookings.txt
- Reload on Application Start

The report uses modular, object-oriented design and selects data structures according to the nature of each application.

Learning Outcomes

Technical Outcomes

- Improved Java syntax and OOP understanding.
- Practical experience with classes, objects, methods and collections.
- Console and GUI- based interaction.
- Input validation and application flow control.
- Basic NLP preprocessing and intent matching.
- File- based persistence.

Development Outcomes

- Translate problem statements into working solutions.
- Break applications into manageable modules.
- Test valid and invalid scenarios.
- Document project purpose, implementation and outcomes.
- Build confidence in structured software development.

CONCLUSION

- The four projects provide practical exposure to Java application development.
- OOP, data management, user interaction, validation and persistence were applied.
- Each project addresses a distinct real-world- inspired problem.

FUTURE SCOPE

- Add database integration and authentication.
- Improve GUI design and application usability.
- Integrate APIs and richer real- time data.
- Extend applications toward web-based deployment.

CODE ALPHA

YOUR DREAM OUR PASSION

INTERNSHIP OFFER LETTER

Date: 2nd September 2026 Student ID: CA/DF1/268905

Name: Ayush Kumar

Welcome to CodeAlpha.

Congratulations! We are happy to offer you the position of **Java Programming** Intern at CodeAlpha. This letter confirms your selection for our Virtual Java Programming Internship, starting from **10th September 2026 to 10th October 2026**.

The internship will be conducted completely online and will give you an opportunity to work on practical assignments and projects related to Java Programming. You will be able to apply what you already know, improve your technical skills and gain hands-on experience.

Throughout the internship, you are expected to participate actively, complete the assigned tasks on time and follow the guidelines shared by CodeAlpha. We also expect you to maintain professional conduct and communicate responsibly during the internship.

A performance-based stipend may be provided depending on your performance, participation, contribution and completion of assigned work, as per the applicable terms of the internship program.

We are pleased to have you join us and look forward to your participation. We hope this internship will be a valuable and enjoyable experience for you.

We wish you all the best for your internship with CodeAlpha.

Best regards,

Swati Srivastava
Co-Founder & CEO
